

Quality Control Technician

WPT Power Corporation, a mechanical power transmission manufacturer, is recruiting for a Quality Control Technician position. This candidate will be responsible for ensuring implementation of quality assurance, control procedures, in-process inspections, and completed product inspections.

► **JOB RESPONSIBILITIES:**

- Verifies and maintains quality control records.
- Prepares and reviews quality trends including complaints and incident reports.
- Reports serious or repeated failures or unreliability in quality of products.
- Recommends corrective actions or plans/programs for overall defect reductions in products.
- Performs other quality control functions as necessary or as requested.
- Actively participates in quality assurance development, goals, and reviews.

► **EDUCATION OR SKILL REQUIREMENTS:**

- Good communications skills and the ability to work well with people are essential.
- Should be able to comprehend simple to very detailed schematics, blueprints and possible diagrams.
- An understanding in quality processes is preferred.
- Must have a high degree of manual dexterity and be mechanically inclined.
- Ability to use a variety of precision measuring instruments such as bore gauge and micrometers as well as test equipment.
- Quality experience required.

Interested candidates email resume to WPT Power's Human Resources department at, HR@WPTpower.com or call, 940-761-1971.
